EdUCATION

Khwaja Moinuddin Chishti Language University, Lucknow Lucknow
Bachelor's of Computer Application *GPA: 7.68* Aug 2023 - Jun 2026

ExPERIENCE

TECHMELD IT SERVICES Remote
Web *Developer Intern* Dec - Jan

- Working as a **Web Developer Intern** on **Basic Chat Application**, contributing to the design, development, and optimization of a chat-oriented web platform.
- Building responsive, user-centric interfaces and reusable UI components, integrating seamlessly with backend APIs to deliver dynamic content and a consistent cross-device UX.
- Optimizing frontend performance and stability through clean code practices, debugging, UI testing, and cross-browser compatibility, while working on a live production codebase.

Samsung Innovation Campus (LINK) Khwaja Moinuddin Chisti Language University, Lucknow
Technical Trainee Sep 2024

- Completed a rigorous 6-week technical training program covering 5+ advanced domains, including AI, Cloud Computing (AWS), IoT, and Generative AI, with practical hands-on experience.
- Leaded with a team of 5 developers to complete all deliverables 4 weeks ahead of schedule, maintaining 100% code reliability during testing and most importantly gain leadership quality throughout full journey .
- Designed and deployed 1 full-scale AI projects integrating custom ML/DL models and 3 Generative AI APIs, achieving 95% automation accuracy and scalability using prompt engineering.

LaNGUAGES AND TECHNOLOGIES

Programming Languages:	- JavaScript (Basics), Python, C++, Database: SQL
Frameworks/Technologies/Tools:	Visual Studio Code, Git , Node.js, Express.js, REST API Frontend: HTML, CSS, Bootstrap, XML, React
Problem Solving:	Data Structures and Algorithms, System Design

PERSONAL PROJECTS

Project: Chat Application

Tech Stack :- *HTML5,CSS3,JavaScript (ES6+), Responsive Design, REST API Integration, Git/GitHub*

Key Contributions:-

Engineered a real-time, bi-directional messaging architecture using WebSockets (Socket.io), achieving sub-100ms latency for seamless user communication. Designed and implemented a normalized database schema with optimized indexing, reducing message retrieval times by ~40% even under heavy data loads. Integrated secure authentication (JWT) and end-to-end encryption protocols, ensuring 100% data privacy and preventing unauthorized access across all user sessions.

Project: Basic Text-Editer

Tech Stack :- *HTML5,CSS3, JavaScript (ES6+), Git/GitHub, Vercel*

Key Contributions:-

Owned the end-to-end development of a lightweight text editing engine, designing a modular vanilla JavaScript architecture without reliance on external frameworks. Built a semantic, accessibility-focused UI using pure CSS, achieving 100% responsiveness and consistent rendering across varied screen sizes.

CERTIfICATES

Generative AI (LINK)
Completed advanced Prompt Engineering training, focusing on effective prompt design and real-world Generative AI applications. Nov 2024

Software Engineering Job Simulation - Goldman Sachs (viaForage) (LINK)

Evaluated enterprise-grade password protection mechanisms, auditing weak hashing algorithms to propose robust, NIST-compliant cryptographic standards for enhanced user data integrity and system resilience.
